

Complimentary Golf Body-Motion Video Analysis Instructions

- Capture your full golf body-motion on video using an iPad or your cell phone.

- Shoot your golf body-motion videos from three body angles... the 'front' view (facing the camera), the 'back' view (back facing the camera), and from the 'down-the-line' view (right shoulder facing the camera if you are a right-handed golfer or from the left shoulder facing the camera if you are a left-handed golfer).

NOTE! Hitting a golf ball when capturing your golf body-motion video is preferred but optional.

- Take 'two' full golf swings from each body position.
- Send 'Email' your golf body-motion videos for full analysis to: Paul@CallawayGolfFitness.com using one of the options described [→HERE←](#)... Or simply 'text' your videos to: (630) 567-7572
- Once received, Dr. Callaway will email his **full written report** including photo descriptions of the 'physical/structural' elements within your body that are causing your identified golf body-motion compensations within 48-hours.
- And, Dr. Callaway will schedule a **brief (10-15 minute), follow-up consultation over the phone... or via FaceTime/Skype...** to discuss your golf body-motion analysis, and the '**custom**' **total golf performance training options** recommended for you to most effectively improve your golf body-motion and total golf performance results.
